INTRODUCTION

This report represents statistical data compiled by the Bureau of Dangerous Drugs concerning illicit drug users and drug-related offences in Canada for the calendar year 1982. Regular users of this publication will note that a number of changes in format and content have been made in this edition. To begin with, publication has been renamed "Narcotic, Controlled and Restricted Drug Statistics". Further, it has been divided into four sections entitled "Legal Statistics", "User Statistics", "Diversion Statistics" and "Drug Analyses Statistics". Each section is preceded by an outline of the information it contains, the source of the data and some mention of the limitations of the data. In the Diversion Statistics section, certain tables have been expanded to show data covering a four year period. Tables dealing with Schedule F drugs have been dropped while tables describing the actual quantities of narcotic and controlled drugs stolen have been added.

In its continuing efforts to improve the quality of its statistical publication, the Department is most interested in receiving comments of data users. Comments may be directed to the Chief, Information Services Division, Bureau of Dangerous Drugs, Ottawa, Ontario, K1A 1B9.

INTRODUCTION

Ce rapport représente les données statistiques compilées par le Bureau des drogues dangereuses concernant les usagers de drogues illégales ainsi que les infractions reliées aux drogues commises en 1982. Les familiers de cette publication noteront que la présente édition comporte un certain nombre de changements dans le format et le contenu. Tout d'abord la publication est nommée "Statistiques Concernant les Stupéfiants, les Drogues Contrôlées et les Drogues d'Usage Restreint". De plus le tout est divisé en quatre sections intitulées "Statistiques judiciaires", "Statistiques des usagers", "Statistiques sur les détournements" et "Statistiques sur les analyses de drogues". Chaque section est précédée d'un aperçu des informations contenues, de la source des données et quelques explications à propos des limitations des données. Dans la section "Statistiques sur les détournements" certains tableaux ont été élargis pour y inclure des données qui couvrent une période de quatre années. Les tableaux relatifs aux drogues de l'Annexe "F" furent éliminés mais des tableaux qui rapportent les quantités réelles de stupéfiants et de drogues contrôlées volés ont été ajoutés.

Beaucoup d'efforts sont déployés pour l'amélioration des statistiques annuelles et le Ministère vous saurait gré des commentaires ainsi que des questions que vous voudrez bien lui faire parvenir. Vous pourrez les adresser au Chef, Division des services de l'information, Bureau des drogues dangereuses, Ottawa, Ontario K1A 1B9.

LEGAL STATISTICS

STATISTIQUES JUDICIAIRES

LEGAL STATISTICS

The Minister of National Health and Welfare is responsible for the disposition of drugs and assets seized by police forces under the Narcotic Control Act and Parts III and IV of the Food and Drugs Act. To fulfill this responsibility, the Minister requires police forces to report details of cases where offences have been committed under these statutes and their respective regulations. In addition, some police forces routinely submit information on offences under the Criminal Code when drugs are involved. Data represented in this section have been extracted from these reports.

In order to properly interpret the information contained in these tables it is important to remember the following points:

- the date of disposition of a case is used to determine the year in which it is recorded in the statistics
- the age upon the date of arrest is used as the criteria for inclusion in tables dealing with age groups
- in some cases multiple penalties are imposed (e.g. - 2 years gaol and \$1,000, 6 months gaol or \$200). The Drug Offence Report does not, in most cases, identify the final sentence option chosen or imposed. Further, the program used for the legal statistics does not permit the input of more than one sentence per case. As such a priority ranking of "gaol" over "fines" over "probation" is used. While this eliminates multiple counting of individual convictions, it does introduce a few confounding factors when interpreting some of the tables.

STATISTIQUES JUDICIAIRES

Le Ministre de la Santé nationale et du Bien-être social a pour responsabilité la disposition des drogues et des biens saisis par les agents de police en vertu de la Loi sur les stupéfiants et des parties III et IV de la Loi des aliments et drogues. Afin de s'acquitter de cette responsabilité, le Ministre exige que les corps de police fassent des rapports détaillés sur les cas d'infraction à ces lois et à leurs règlements respectifs. En outre, dans certains corps de police, il est d'usage de fournir des renseignements sur les infractions au Code criminel liées à la drogue. Les données présentées ici sont tirées de ces rapports.

Pour interpréter correctement les renseignements contenus dans les tableaux, il importe de se rappeler les points suivants:

- la date du jugement d'une cause sert à déterminer l'année où cette cause est enregistrée dans les statistiques;
- l'âge du prévenu au moment de son arrestation est celui qui figure dans les tableaux présentant les groupes d'âges;
- dans certains cas, des peines multiples sont imposées (p. ex., 2 ans d'emprisonnement et \$1,000 d'amende, 6 mois d'emprisonnement ou \$200 d'amende). Le plus souvent, le Rapport concernant une infraction aux lois sur la drogue n'indique pas quelle sentence a été finalement choisie ou imposée. De plus, le programme utilisé pour les statistiques judiciaires ne permet pas d'inscrire plus d'une sentence par cause. C'est pourquoi les sentences sont classées par ordre décroissant de priorité, soit: emprisonnement, amende, libération conditionnelle, et inscrites en conséquence. La possibilité de compter plus d'une fois une même condamnation est ainsi éliminée, mais par la même occasion, quelques facteurs de confusion se trouvent introduits dans l'interprétation de certains des tableaux.

USER STATISTICS

STATISTIQUES DES USAGÉS

USER STATISTICS

The data presented in this section does not represent all users of narcotic and restricted drugs but merely those individuals identified as such. Information in this regard is obtained from various sources including Drug Offence Report forms submitted by police agencies, investigation reports submitted by inspection staff with the Bureau of Dangerous Drugs, Health Protection Branch, reports received from addiction treatment centres and correspondence received from medical or dental practitioners as part of an investigation.

The determination of an individual's drug use is in many cases, subjective and circumstantial and as such the accuracy of the data may suffer as a result. A further limitation exists related to poly drug users. The current computer system used to collect, manipulate and tabulate this data will only permit an individual to be identified as the user of one drug at any given time. In cases of poly drug use the following prioritized drug list is employed: heroin, cocaine, phencyclidine and hallucinogens. The individual is recorded as a user of that drug among all the drugs that he/she is reported to use which is highest on the list. For these reasons, the data should not be considered in isolation as it may result in a distorted or incomplete view of drug use trends.

In order to provide better data regarding trends of drug usage, this section of the publication is currently under review. It is anticipated that revised drug user statistics will be available for the next edition of this publication.

STATISTIQUES DES USAGÉS

Les données figurant dans la présente partie ne représentent pas tous les consommateurs de stupéfiants et de drogues d'usage restreint, mais simplement les individus reconnus comme tels. Les renseignements à ce sujet proviennent de diverses sources, dont les formules "Rapport concernant une infraction aux lois sur la drogue" présentées par les corps de police, les rapports d'enquête présentés par les inspecteurs du Bureau des drogues dangereuses (Direction générale de la protection de la santé), les rapports reçus des centres de désintoxication, et la correspondance provenant de médecins et de dentistes dans le cadre d'une enquête.

Dans de nombreux cas, la consommation de drogue d'un individu est déterminée de façon subjective et dépend des circonstances, ce qui peut altérer l'exactitude des données. Une autre limitation tient au fait que certains consomment plusieurs drogues différentes. Le système informatique actuel qui sert à rassembler, à manipuler et à tabuler ces données ne permet de retenir que le nom d'une seule drogue par individu à un moment donné. Ainsi, lorsqu'il y a consommation de plusieurs drogues par un même individu, on inscrit celle qui apparaît la première dans l'ordre décroissant de priorité qui suit: héroïne, cocaïne, phencyclidine, hallucinogènes. Il ne faut donc pas considérer les données isolément, car elles pourraient alors donner une impression fautive ou incomplète des tendances en ce qui concerne la consommation de drogues.

La présente partie de la publication est actuellement en voie de révision, en vue d'améliorer les données sur les tendances relatives à la consommation de drogues. Il est à prévoir que la prochaine édition contiendra des statistiques révisées sur les usagers de drogue.

DIVERSION STATISTICS

STATISTIQUES SUR LES DÉTOURNEMENTS

DIVERSION STATISTICS

For the purpose of these statistics "diversion" is defined as the movement of licit narcotic and controlled drugs from the health care system for non-medical use. It encompasses the following:

- Theft in all forms including break and entry, armed robbery, snatch and grab, pilferage;
- Unexplained Losses;
- Losses during Transit;
- Forgery;
- Verbal misrepresentation;

Diversion may occur at any point between the manufacturing or importation of the drug and its utilization by the patient.

The Regulations to the Narcotic Control Act and The Food and Drugs Act stipulate that the loss or theft of a narcotic or controlled drug must be reported to the Minister of Health and Welfare within ten days of discovery. Information is extracted from these reports, compiled and published as a component of the Diversion Statistics.

Two important changes have been implemented in this year's presentation of the statistics on thefts and losses. They are as follows:

- (i) Four years of data;
- (ii) Quantities of drugs involved in thefts and losses

Reports involving the diversion of narcotic and controlled drugs obtained by means of forged prescriptions and verbal misrepresentation are received from various sources including police agencies inspection staff with the Bureau of Dangerous Drugs and, on a voluntary basis, from pharmacists.

STATISTIQUES SUR LES DÉTOURNEMENTS

Aux fins des présentes statistiques, le terme "détournement" désigne le mouvement de stupéfiants licites et de drogues contrôlées obtenues par l'intermédiaire du système de santé et destinées à des usages non médicaux. Il englobe:

- le vol sous toutes ses formes, dont le vol par effraction, le vol à main armée, le vol à l'arraché et le larcin;
- les pertes inexplicables;
- la perte de drogues pendant leur transport;
- ordonnances contrefaites;
- les déclarations trompeuses;

Il peut y avoir détournement à n'importe quel point entre le moment où le médicament est fabriqué ou importé, et celui où il est utilisé par le patient.

Les règlements respectifs de la Loi sur les stupéfiants et de la Loi des aliments et drogues stipulent que la perte ou le vol d'un stupéfiant ou d'une drogue contrôlée doit être signalé au ministre de la Santé nationale et du Bien-être social dans les dix jours qui en suivent la constatation. Les renseignements tirés de ces rapports sont réunis et publiés dans les statistiques sur les détournements.

Cette année, deux changements importants ont été apportés à la présentation des statistiques sur les vols et les pertes:

- (i) présentation de données portant sur quatre ans (1979-1982);
- (ii) indication des quantités de drogue volées ou perdues.

A l'heure actuelle, il n'y a pas de statistiques sur le détournement de stupéfiants et de drogues contrôlées au moyen de contrefaçons d'ordonnances et de déclarations trompeuses. Les rapports ayant trait à ce type de détournements proviennent de diverses sources dont les corps de police, les inspecteurs du Bureau des drogues dangereuses et les pharmaciens agissant de leur propre chef.

In order to promote and facilitate the reporting of diversion by prescription forgery and verbal misrepresentation a reporting system is being developed. The basis of the system is a reporting form to be submitted by the pharmacist when successful or attempted diversion by these means is identified. The data collected will be presented in future editions of this publication.

Un système est en train d'être mis au point afin d'encourager et de faciliter la présentation de rapports sur les détournements résultant de l'usage de faux ou de déclarations trompeuses. Ce système repose sur l'utilisation d'une formule que doivent remplir les pharmaciens témoins d'une tentative (réussie ou ratée) de détournement par ces moyens. Les données ainsi recueillies seront présentées dans les prochaines éditions de la présente publication.

DRUG ANALYSIS STATISTICS

STATISTIQUES SUR LES ANALYSES DE DROGUES

DRUG ANALYSIS STATISTICS

The information contained in the following tables represents data regarding the identity and number of drug samples analysed by the Bureau of Field Operations (Field Operations Directorate, Health Protection Branch). The drug samples in question are submitted for analysis by police agencies as part of the evidence gathering process in preparation for the prosecution of a drug related charge. Used in conjunction with other data these tables can demonstrate trends in drug misuse and street availability.

STATISTIQUES SUR LES ANALYSES DE DROGUES

Les renseignements contenus dans les tableaux suivants représentent des données sur l'identité et le nombre d'échantillons de drogue analysés par le Bureau des opérations régionales (Direction des opérations régionales, Direction générale de la protection de la santé). Les échantillons en question sont envoyés pour analyse par des corps de police aux fins de la collecte de preuves en prévision de poursuites relatives à une accusation d'infraction aux lois sur les drogues. Utilisées conjointement avec d'autres données, les données de ces tableaux peuvent indiquer certaines tendances en matière de consommation et de disponibilité des drogues.

INTRODUCTION

This report represents statistical data compiled by the Bureau of Dangerous Drugs concerning illicit drug users and drug-related offences in Canada for the calendar year 1983. Data for the tabulations come from the reports submitted by law enforcement agencies received and processed prior to June 30, 1984. Information for the years 1979 to 1982 contained in the 1982 edition of the statistics has been updated to include cases reported after the cut off date for that edition.

During the year 1983 convictions under all federal drug related legislation dropped 20% to 31,444 compared with 39,226 in 1982. The major component of these totals is represented by convictions involving cannabis which are detailed as follows:

| <u>Cannabis</u> | <u>1982</u> | <u>1983</u> | <u>% de changement</u> <u>% Change</u> |
|---|-------------|-------------|---|
| Possession | 27,687 | 21,547 | - 22 |
| Trafficking/Trafic | 2,929 | 2,475 | - 16 |
| Possession for the purpose of Trafficking/ Possession en vue d'un trafic | 3,342 | 2,429 | - 27 |
| Importation | 7 | 15 | 114 |
| Cultivation/Culture | 137 | 158 | 15 |
| Conspiracy/Conspiration | 127 | 153 | 20 |
| All Convictions (Cannabis)/ Total des condamnations (Cannabis) | 34,235 | 26,778 | - 22 |

The foregoing tends to confirm the change in police enforcement emphasis towards more complex investigations involving importation, conspiracy and, to a lesser degree, trafficking. This change in emphasis should be much more apparent in the 1984 statistics due to the time required for investigation and processing through the Courts.

INTRODUCTION

Ce rapport représente les données statistiques compilées par le Bureau des drogues dangereuses concernant les usagers de drogues illégales ainsi que les infractions reliées aux drogues commises en 1983. Les données présentées dans les tableaux ont été tirées des rapports soumis par les forces policières, et qui ont pu être traitées avant le 30 juin 1984. Les renseignements concernant les années de 1979 à 1982 présentés dans les statistiques de 1982 ont été mis à jour afin d'inclure les cas signalés après la date limite de présentation pour l'édition de 1982.

En 1983, le nombre de condamnations en vertu de tous les règlements fédéraux relatifs aux drogues a connu une diminution de l'ordre de 20% par rapport à l'année précédente, passant de 39,226 à 31,444. Dans la majorité de ces cas, les condamnations mettent en cause le cannabis, pour les motifs suivants:

Ces résultats tendent à confirmer la nouvelle tendance des forces policières vers l'exécution d'enquêtes plus poussées dans les cas d'importation, de conspiration et, à un degré moindre, de trafic. Cette surveillance plus étroite devrait transparaître de façon plus évidente dans les statistiques de 1984, étant donné la période nécessaire au déroulement des enquêtes et aux démarches devant les tribunaux.

One indication of the impact of this enforcement activity can be seen in the increased number of convictions involving cultivation. The majority of these convictions were recorded in the provinces of Ontario, Quebec and British Columbia. Police information suggests that in addition to the conventional outdoor cultivation, a significant number of indoor hydroponic operations have been uncovered. Due to the ideal and controlled growing condition that this latter method of cultivation provides it has been found to be primarily used to produce high grade cannabis.

Convictions involving heroin for 1983 dropped to 205 from the 1982 total of 291 a difference of approximately 30%. Police information, however, suggests that during 1983 there was an increase in the availability of heroin. This is supported by other indicators such as drug sample analysis. In 1982, 513 samples of heroin were analysed while in 1983 this total rose to 862 a difference of 68%. One explanation for this apparent discrepancy could be that cases involving heroin are more complex and require more time to pass through the Court system and ultimately appear in the conviction statistics.

Convictions involving cocaine rose 6% to 1460 in 1983 from the 1982 total of 1382. Details for the specific charges involving cocaine are as follows:

| <u>Cocaine/Cocaïne</u> | <u>1982</u> | <u>1983</u> | <u>% de changement</u> <u>% Change</u> |
|---|-------------|-------------|---|
| Possession | 716 | 787 | 10 |
| Trafficking/Trafic | 300 | 297 | ---- |
| Possession for the purpose of Trafficking/ Possession en vue d'un trafic | 267 | 279 | 5 |
| Importation | 12 | 27 | 125 |

Ces mesures de réglementation plus sévères se traduisent entre autres par l'augmentation du nombre de condamnations pour motif de culture. La plupart de ces condamnations ont été enregistrées en Ontario, au Québec et en Colombie-Britannique. Les renseignements obtenus des forces policières laissent penser qu'outre les méthodes conventionnelles de culture à l'extérieur, un certain nombre d'installations intérieures de culture hydroponique ont pu échapper à toute surveillance. Étant donné les conditions idéales et contrôlées de croissance que cette méthode permet d'obtenir, il semble qu'il s'agisse là d'une méthode importante de production de plants de cannabis de qualité supérieure.

Les condamnations relatives à l'héroïne ont chuté, entre 1982 et 1983, de 291 à 205: il s'agit d'une diminution approximative de 30%. Les sources policières de renseignements semblent toutefois indiquer que la disponibilité de l'héroïne a augmenté en 1983. Ces suppositions sont étayées par d'autres indices, comme l'analyse d'échantillons de drogues. En 1983, en effet, 862 échantillons d'héroïne ont été analysés par rapport à 513 en 1982; cette augmentation représente une différence de l'ordre de 68%. On peut expliquer cet écart apparent par la plus grande complexité des condamnations relatives à l'héroïne et le délai important occasionné par le traitement judiciaire de ces cas, ce qui se traduit dans les statistiques.

Pour ce qui est de la cocaïne, le nombre de condamnations a augmenté de 6%, passant de 1382 à 1460 depuis l'an dernier. Voici le détail des accusations relatives à la cocaïne:

Police intelligence and other indicators such as drug sample analysis confirm that the trend of increased cocaine availability demonstrated in the preceeding four years continued in 1983. During 1982, 2460 samples containing cocaine were analysed. This total rose to 3738 in 1983 a difference of 52%. It is anticipated that this trend will continue.

There remains continued interest in licit (prescription) narcotic drugs as demonstrated by the following data:

Les sources de données policières et d'autres renseignements, comme l'analyse d'échantillons de drogues, confirment que la tendance observée depuis quatre ans, révélant une augmentation de la disponibilité de la cocaïne, s'est poursuivie en 1983. En 1982, on a analysé 2460 échantillons de drogues renfermant de la cocaïne et 3738 en 1983, ce qui représente une augmentation de 52%. Cette tendance à la hausse devrait se poursuivre.

L'intérêt manifesté pour les stupéfiants licites (vendus sous ordonnance) demeure inchangé, comme le démontrent les données suivantes:

| | <u>A</u> | <u>B</u> | <u>C</u> | <u>D</u> |

| 1982 | 9 | 7 | 7 | ---- |
| 1983 | 13 | 8 | 7 | ---- |
| % Change/% de changement | 44 | ---- | ---- | ---- |

A - Possession

B - Trafficking/Trafic

C - Possession for the purpose of trafficking/Possession en vue d'un trafic

D - Multiple Doctoring/Consultations de plusieurs médecins

There exists a significant degree of under reporting relating to this class particularly when no drugs are seized such as in cases of multiple doctoring and prescription forgery. Systems are currently being developed to capture data relating to the foregoing. Statistics on drug sample analysis show that licit (prescription) narcotic drugs continue to appear in samples submitted confirming their continued availability on the street.

The prevalence and relative importance of these drugs in the illicit market is also supported by police intelligence. Yet to be positively confirmed is the theory that there exists two groups of users. One group is thought to rely on licit (prescription) narcotic drugs as their primary drugs of addiction while the second group resorts to such drugs when the availability or quality of heroin is poor. Further study in this matter may be required.

Convictions involving pentazocine dropped 16% (43 to 36). This, however, should not be interpreted as decreased interest in the drug since it continues to be a target for diversion by various means including armed robbery and break and entry theft. Further, pentazocine continues to appear in drug sample analysis particularly in central and western Canada.

Convictions involving barbiturates and methaqualone remain relatively unchanged over the 1982 figures. Methylphenidate and diethylpropion convictions have, on the other hand, increased. Drug sample analysis involving methylphenidate rose 23% to 81 from the 1982 total of 66. A majority of the 1983 total (73) appeared in Western Canada.

Dans cette catégorie, un nombre important de cas ne sont pas déclarés, tout particulièrement en l'absence de saisie dans des cas de consultations de plusieurs médecins et de falsification de prescription. On est actuellement à mettre au point des systèmes pour recueillir des données à ce sujet. Les statistiques sur l'analyse des échantillons de drogues démontrent que les stupéfiants licites (vendus sous ordonnance) continuent d'être découverts dans les échantillons présentés, ce qui confirme leur continuelle disponibilité sur le marché clandestin.

Leur prévalence et leur importance relatives sur le marché illicite sont également confirmées par les sources policières. Une théorie, qui demeure à vérifier, concerne l'existence de deux groupes d'utilisateurs: les premiers s'adonneraient principalement à la consommation de stupéfiants licites (vendus sous ordonnance) alors que les seconds se tourneraient vers ces drogues uniquement lorsqu'ils éprouvent des difficultés d'approvisionnement en héroïne ou lorsque la qualité de cette dernière laisse à désirer. Cette hypothèse doit être étudiée davantage.

Les condamnations relatives à la pentazocine ont connu une baisse de 16% de 1982 à 1983 (de 43 à 36). Il faut cependant prendre garde d'interpréter ces données comme indiquant une diminution de la popularité de cette drogue, car elle constitue toujours une cible de détournement par divers moyens, y compris le vol à main armée et le vol par effraction. En outre, cette drogue est régulièrement découverte au cours des analyses d'échantillons, principalement dans les régions centrales et occidentales du pays.

Les condamnations relatives aux barbituriques et à la méthaqualone sont demeurées relativement stables par rapport à 1982. Par contre, les condamnations relatives au méthylphénidate et au diéthylpropion ont augmenté. Le nombre d'échantillons de drogues dans lesquels l'analyse a permis de découvrir du méthylphénidate a connu une hausse de 23% entre 1982 et 1983, passant de 66 à 81. La majorité des échantillons analysés en 1983 (73) provenaient de l'ouest du pays.

Convictions

| | A | B |
|---------------------------------|------|------|

A - Break & Enter/Vols par effraction

B - Armed Robbery/Vols à main armée

C - All diversion (excluding forgery and multiple doctoring)/tous détournements (à l'exception des falsifications et des consultations de plusieurs médecins)

D - Sample Analysis/Analyses d'échantillons

Convictions under all federal drug related legislation for methamphetamine show a drop of 40% from the 112 conviction level in 1982 to 67 recorded in 1983. This is at variance with police intelligence which suggests that supplies of methamphetamine are not decreasing but rather have stabilized and in some areas increased. Drug analysis statistics support the latter showing 239 samples of methamphetamine in 1983 compared to 175 in 1982, an increase of 37%.

It would appear that based on available intelligence information and statistical data the overall trend towards stimulants such as cocaine and away from central nervous system depressants demonstrated in the preceding four years continued during 1983.

Convictions involving Phencyclidine (PCP) decreased 42% from 698 reported in 1982 to 407 in 1983. A 47% decrease over 1982 figures was seen in drug sample analysis (1248 to 662). This and information from drug intelligence reports tends to support the theory of reduced interest in phencyclidine.

With the exception of psilocybin convictions involving restricted drugs decreased during 1983.

Les condamnations en vertu de tous les règlements fédéraux concernant la méthamphétamine ont chuté de 40%, passant de 112 à 67 entre 1982 et 1983. Ces résultats diffèrent de ceux recueillis par les corps policiers qui semblent indiquer que les approvisionnements de la méthamphétamine ne diminuent pas mais se sont plutôt stabilisés et ont augmenté dans certains secteurs. Les statistiques de l'analyse des échantillons vont dans le même sens, car 239 échantillons renfermaient de la méthamphétamine en 1983 comparativement à 175 en 1982, soit une augmentation de 37%.

Selon les renseignements et les données statistiques disponibles, il semblerait que la tendance générale observée durant les quatre années précédentes, révélant un intérêt pour les stimulants comme la cocaïne et une baisse de popularité des dépresseurs du système nerveux central, se soit poursuivie en 1983.

Les condamnations mettant la phencyclidine (PCP) en cause sont en effet passées de 698 à 407 entre 1982 et 1983, ce qui représente une diminution de 42%. Par ailleurs, on a constaté une baisse de 47% au niveau des résultats d'analyses d'échantillons de drogues (1248 échantillons contenaient du PCP en 1982 contre 662 en 1983). Ces données et les renseignements tirés des rapports policiers appuient cette vraisemblable diminution de la popularité du PCP.

À l'exception du Psilocybine, les condamnations relatives à des drogues d'usage restreint ont été moins nombreuses en 1983.

| | <u>1982</u> | <u>1983</u> | <u>% de changement</u> <u>% Change</u> |
|---------------|-------------|-------------|---|
| L.S.D. | 1730 | 1209 | - 30 |
| M.D.A. | 71 | 62 | - 13 |
| Psilocybin(e) | 68 | 561 | 725 |
| P.C.E. | 8 | 3 | - 63 |

The dramatic rise in psilocybin convictions can, for the most part, be attributed to a Supreme Court of Canada decision in R. v. Dunn 1982 2 S.C.R. 677. The decision in question overturned a lower court ruling that the mushrooms in their natural state were not subject to the provisions of Part IV of the Food and Drugs Act.

In its continuing efforts to improve the quality of its statistical publication, the Department is most interested in receiving comments of data users. Comments may be directed to the Chief, Information Services Division, Bureau of Dangerous Drugs, Ottawa, Ontario, K1A 1B9.

Department of National Health and Welfare**

**Published by authority of
The Minister of National Health and Welfare**

La très forte augmentation du nombre des condamnations relatives à la psilocybine découle en grande partie de la décision rendue par la cour suprême du Canada dans le cas R. c. Dunn 1982 2 R.C.S. 677, qui renversait la décision d'un tribunal inférieur selon laquelle les champignons, à l'état naturel, n'étaient pas assujettis aux dispositions de la partie IV de la Loi des aliments et drogues.

Beaucoup d'efforts sont déployés pour l'amélioration des statistiques annuelles et le Ministère vous saurait gré des commentaires ainsi que des questions que vous voudrez bien lui faire parvenir. Vous pourrez les adresser au Chef, Division des services de l'information, Bureau des drogues dangereuses, Ottawa, Ontario K1A 1B9.

LEGAL STATISTICS

STATISTIQUES JUDICIAIRES

LEGAL STATISTICS

The Minister of National Health and Welfare is responsible for the disposition of drugs and assets seized by police forces under the Narcotic Control Act and Parts III and IV of the Food and Drugs Act. To fulfill this responsibility, the Minister requires police forces to report details of cases where offences have been committed under these statutes and their respective regulations. In addition, some police forces routinely submit information on offences under the Criminal Code when drugs are involved. Data represented in this section have been extracted from these reports.

In order to properly interpret the information contained in these tables it is important to remember the following points:

- the date of disposition of a case is used to determine the year in which it is recorded in the statistics
- the age upon the date of arrest is used as the criteria for inclusion in tables dealing with age groups
- in some cases multiple penalties are imposed (e.g. - 2 years gaol and \$1,000, 6 months gaol or \$200). The Drug Offence Report does not, in most cases, identify the final sentence option chosen or imposed. Further, the program used for the legal statistics does not permit the input of more than one sentence per case. As such a priority ranking of "gaol" over "fines" over "probation" is used. While this eliminates multiple counting of individual convictions, it does introduce a few confounding factors when interpreting some of the tables.
- cases with a disposition of "suspended sentence and fine" are recorded under "fine". The other possibility of "probation" with the former are recorded in a new column entitled "suspended sentence/probation". Data previously found in these individual columns have been combined under this new heading.

STATISTIQUES JUDICIAIRES

Le Ministre de la Santé nationale et du Bien-être social a pour responsabilité la disposition des drogues et des biens saisis par les agents de police en vertu de la Loi sur les stupéfiants et des parties III et IV de la Loi des aliments et drogues. Afin de s'acquitter de cette responsabilité, le Ministre exige que les corps de police fassent des rapports détaillés sur les cas d'infraction à ces lois et à leurs règlements respectifs. En outre, dans certains corps de police, il est d'usage de fournir des renseignements sur les infractions au Code criminel liées à la drogue. Les données présentées ici sont tirées de ces rapports.

Pour interpréter correctement les renseignements contenus dans les tableaux, il importe de se rappeler les points suivants:

- la date du jugement d'une cause sert à déterminer l'année où cette cause est enregistrée dans les statistiques;
- l'âge du prévenu au moment de son arrestation est celui qui figure dans les tableaux présentant les groupes d'âges;
- dans certains cas, des peines multiples sont imposées (p. ex., 2 ans d'emprisonnement et \$1,000 d'amende, 6 mois d'emprisonnement ou \$200 d'amende). Le plus souvent, le Rapport concernant une infraction aux lois sur la drogue n'indique pas quelle sentence a été finalement choisie ou imposée. De plus, le programme utilisé pour les statistiques judiciaires ne permet pas d'inscrire plus d'une sentence par cause. C'est pourquoi les sentences sont classées par ordre décroissant de priorité, soit: emprisonnement, amende, libération conditionnelle, et inscrites en conséquence. La possibilité de compter plus d'une fois une même condamnation est ainsi éliminée, mais par la même occasion, quelques facteurs de confusion se trouvent introduits dans l'interprétation de certains des tableaux.
- lorsque dans une cause la sentence est "sentence suspendu et amendé" on l'inscrit comme "amende". Une autre possibilité est "probation et sentence suspendue", ces cas sont groupés sous le nouveau titre "sentence suspendue/probation". Les données antérieures comprises sous les titres individuels ont été regroupées sous le nouveau titre.

USER STATISTICS

STATISTIQUES DES USAGERS

USER STATISTICS

The data presented in this section does not represent all users of narcotic and restricted drugs but merely those individuals identified as such. Information in this regard is obtained from various sources including Drug Offence Report forms submitted by police agencies, investigation reports submitted by inspection staff with the Bureau of Dangerous Drugs, Health Protection Branch, reports received from addiction treatment centres and correspondence received from medical or dental practitioners as part of an investigation.

The determination of an individual's drug use is in many cases, subjective and circumstantial and as such the accuracy of the data may suffer as a result. A further limitation exists related to poly drug users. The current computer system used to collect, manipulate and tabulate this data will only permit an individual to be identified as the user of one drug at any given time. In cases of poly drug use the following prioritized drug list is employed: heroin, cocaine, phencyclidine and hallucinogens. The individual is recorded as a user of that drug among all the drugs that he/she is reported to use which is highest on the list. For these reasons, the data should not be considered in isolation as it may result in a distorted or incomplete view of drug use trends.

This section of the publication is currently under review. Suggestions regarding content or format would therefore be most welcomed.

STATISTIQUES DES USAGERS

Les données figurant dans la présente partie ne représentent pas tous les consommateurs de stupéfiants et de drogues d'usage restreint, mais simplement les individus reconnus comme tels. Les renseignements à ce sujet proviennent de diverses sources, dont les formules "Rapport concernant une infraction aux lois sur la drogue" présentées par les corps de police, les rapports d'enquête présentés par les inspecteurs du Bureau des drogues dangereuses (Direction générale de la protection de la santé), les rapports reçus des centres de désintoxication, et la correspondance provenant de médecins et de dentistes dans le cadre d'une enquête.

Dans de nombreux cas, la consommation de drogue d'un individu est déterminée de façon subjective et dépend des circonstances, ce qui peut altérer l'exactitude des données. Une autre limitation tient au fait que certains consomment plusieurs drogues différentes. Le système informatique actuel qui sert à rassembler, à manipuler et à tabuler ces données ne permet de retenir que le nom d'une seule drogue par individu à un moment donné. Ainsi, lorsqu'il y a consommation de plusieurs drogues par un même individu, on inscrit celle qui apparaît la première dans l'ordre décroissant de priorité qui suit: héroïne, cocaïne, phencyclidine, hallucinogènes. Il ne faut donc pas considérer les données isolément, car elles pourraient alors donner une impression fautive ou incomplète des tendances en ce qui concerne la consommation de drogues.

Cette section est présentement en voie de révision et nous saurions gré à ceux qui nous suggéreraient des modifications quant au contenu ou au format.

DIVERSION STATISTICS

STATISTIQUES SUR LES DÉTOURNEMENTS

DIVERSION STATISTICS

For the purpose of these statistics "diversion" is defined as the movement of licit narcotic and controlled drugs from the health care system for non-medical use. It encompasses the following:

- Theft in all forms including break and entry, armed robbery, snatch and grab, pilferage;
- Unexplained Losses;
- Losses during Transit;
- Forgery;
- Verbal misrepresentation;

Diversion may occur at any point between the manufacturing or importation of the drug and its utilization by the patient.

The Regulations to the Narcotic Control Act and The Food and Drugs Act stipulate that the loss or theft of a narcotic or controlled drug must be reported to the Minister of Health and Welfare within ten days of discovery. Information is extracted from these reports, compiled and published as a component of the Diversion Statistics.

Reports involving the diversion of narcotic and controlled drugs obtained by means of forged prescriptions and verbal misrepresentation are received from various sources including police agencies inspection staff with the Bureau of Dangerous Drugs and, on a voluntary basis, from pharmacists.

STATISTIQUES SUR LES DÉTOURNEMENTS

Aux fins des présentes statistiques, le terme "détournement" désigne le mouvement de stupéfiants licites et de drogues contrôlées obtenues par l'intermédiaire du système de santé et destinées à des usages non médicaux. Il englobe:

- le vol sous toutes ses formes, dont le vol par effraction, le vol à main armée, le vol à l'arraché et le larcin;
- les pertes inexplicables;
- la perte de drogues pendant leur transport;
- ordonnances contrefaites;
- les déclarations trompeuses;

Il peut y avoir détournement à n'importe quel point entre le moment où le médicament est fabriqué ou importé, et celui où il est utilisé par le patient.

Les règlements respectifs de la Loi sur les stupéfiants et de la Loi des aliments et drogues stipulent que la perte ou le vol d'un stupéfiant ou d'une drogue contrôlée doit être signalé au ministre de la Santé nationale et du Bien-être social dans les dix jours qui en suivent la constatation. Les renseignements tirés de ces rapports sont réunis et publiés dans les statistiques sur les détournements.

A l'heure actuelle, il n'y a pas de statistiques sur le détournement de stupéfiants et de drogues contrôlées au moyen de contrefaçons d'ordonnances et de déclarations trompeuses. Les rapports ayant trait à ce type de détournements proviennent de diverses sources dont les corps de police, les inspecteurs du Bureau des drogues dangereuses et les pharmaciens agissant de leur propre chef.

In order to promote and facilitate the reporting of diversion by prescription forgery and verbal misrepresentation a reporting system is being developed. The basis of the system is a reporting form to be submitted by the pharmacist when successful or attempted diversion by these means is identified. The data collected will be presented in future editions of this publication.

Un système est en train d'être mis au point afin d'encourager et de faciliter la présentation de rapports sur les détournements résultant de l'usage de faux ou de déclarations trompeuses. Ce système repose sur l'utilisation d'une formule que doivent remplir les pharmaciens témoins d'une tentative (réussie ou ratée) de détournement par ces moyens. Les données ainsi recueillies seront présentées dans les prochaines éditions de la présente publication.

DRUG ANALYSIS STATISTICS

STATISTIQUES SUR LES ANALYSES DE DROGUES

DRUG ANALYSIS STATISTICS

The information contained in the following tables represents data regarding the identity and number of drug samples analysed by the Bureau of Field Operations (Field Operations Directorate, Health Protection Branch). The drug samples in question are submitted for analysis by police agencies as part of the evidence gathering process in preparation for the prosecution of a drug related charge. Used in conjunction with other data these tables can demonstrate trends in drug misuse and street availability.

STATISTIQUES SUR LES ANALYSES DE DROGUES

Les renseignements contenus dans les tableaux suivants représentent des données sur l'identité et le nombre d'échantillons de drogue analysés par le Bureau des opérations régionales (Direction des opérations régionales, Direction générale de la protection de la santé). Les échantillons en question sont envoyés pour analyse par des corps de police aux fins de la collecte de preuves en prévision de poursuites relatives à une accusation d'infraction aux lois sur les drogues. Utilisées conjointement avec d'autres données, les données de ces tableaux peuvent indiquer certaines tendances en matière de consommation et de disponibilité des drogues.
